### DETAILED ACTION

1. This communication is responsive to Amendment filed 07/02/2007.
2. Claims 1-24 are pending in this application. Claims 1, 11, and 21-22 are independent claims. In Amendment, claims 1, 11, and 21-22 are amended. This Office Action is made final.

#### *Claim Rejections - 35 USC § 101*

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-24 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-24 cite a method and apparatus for determining the interval of which the sum of two numbers is resided in accordance with a mathematical algorithm. In order for claims to be statutory, claims must either include a practical/physical application or a concrete, useful, and tangible result. However, claims 1-24 merely disclose steps/components for determining the interval of which the sum of two numbers is resided without further disclosing a practical/physical application or a useful and tangible result since the claims appear to preempt every substantial practical application of the idea embodied by the claim and there is no cited limitation in the claims that breathes sufficient life and meaning into the preamble so as to limit it to a particular practical application rather than being so broad and sweeping as to cover every substantial

practical application of the idea embodied therein. Therefore, claims 1-24 are directed to non-statutory subject matter.

***Response to Arguments***

5. Applicant's arguments filed 07/02/2007 have been fully considered but they are not persuasive.

a. The applicant argues in page 9 for claims rejected under 35 U.S.C. 101 that the limitation "providing fewer than  $n$  compress circuit" within the claims is a concrete and tangible result as required under 35 U.S.C. 101 since it would be less hardware intensive for performing determination which of  $n$  intervals a sum of two numbers resides.

The examiner respectfully submits that the limitation less hardware intensive is not exclusively disclosed in the claim. Further, the guideline requires claims must have a "result" that is useful, concrete, and tangible which includes a physical or practical application for the claims. However, the claims clearly do not provide any physical/practical application or a useful, concrete, and tangible "result" of determining which of  $n$  intervals a sum of two numbers resides. Therefore, the claims are still rejected under 35 U.S.C. 101 as directed to non-statutory subject matter as clearly addressed in the above rejection.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2193

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
